

HEATING SYSTEM

Reliable Heating Performance

Our poultry heating system features advanced heat distribution technology that ensures consistent and uniform warmth throughout the house. This helps reduce bird stress and promotes improved flock performance. Designed for energy efficiency and built with durable materials, it provides a reliable and cost-effective solution for modern poultry farming operations.

Specification

Gas Heater Options	Available in 225/250 BTU models for natural gas or liquefied petroleum gas (LPG).
Ignition System	Features direct electronic ignition for reliable startup.
Heat Channel	Constructed from aluminized steel plate, offering high reflectivity and superior heat resistance.
Access Design	A double-door structure provides easy access for maintenance and inspection.
Ignition Electrode	Equipped with an adjustable Y-type ignition electrode for optimal positioning.
Drive Motor	Incorporates a 1/3 HP, fully enclosed, thermally protected motor with sealed bearings.
Gas Control Valve	Utilizes a Honeywell gas solenoid valve for enhanced safety.
Airflow Safety	Includes an airflow detection switch to prevent overheating due to insufficient air (dry firing).
Overheat Protection	Fitted with a manual reset overheating protection sensor.
Material Options	Offered in galvanized steel or stainless steel versions.
Operational Indicator	An indicator light on the unit cabinet allows for easy monitoring of normal operation.
