TUNNEL DOOR

The tunnel door system is designed to optimize airflow management in poultry houses, ensuring efficient ventilation during tunnel mode operation. With a robust structure and reliable sealing performance, it helps maintain stable internal conditions while supporting improved bird health and productivity.

Style	Pulley tunnel door / Rack tunnel door
Panel Material	FRP
Bonding Material	12KG/m³EPS 15KG/m³EPS 25KG/m³XPS 35KG/m³XPS
Thickness Of Door Slab	50mm
Frame Material	Aluminium
Motor	0.55kw 600N.M IP55 position feedback with built-in limit switch
Motor	0.75kwkw 800N.M IP55 position feedback with built-in limit switch

- Installed at the back of the cooling pad system; opens in summer, closes in winter to keep warm.
- Excellent insulation, flame-retardant, and directs airflow efficiently.
- Tight sealing, minimal heat loss and leak-proof.
- Optimized airflow with a maximum 90° opening.
